Proceedings of the annual convention Volume 7

By American Railway Association

RareBooksClub. Paperback. Book Condition: New. This item is printed on demand. Paperback. 298 pages. Dimensions: 9.7in. x 7.4in. x 0.6in.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1906 Excerpt: . . . and where it is negative the amount is laid off below the horizontal line. By connecting the extremities of the succeeding ordinates by straight lines or parabolic curves, the resulting figure forms what is called Bruckners curve (Fig. 12). This curve is constructed upon the following assumptions: Fig. 12--Bruckners Curve. (O That each mass of cuts and fills is concentrated on its corresponding point of the longitudinal profile. (2) That on each cross-section only the excesses of the cuts over the fills, or vice versa, are recorded, and consequently the volume of earth transferred from cut to fill by shovel is not considered. Bruckners curve possesses a number of important properties which may be summarized as follows: (1) The maximum and minimum of the curve correspond to the points at grade where the cut ends and the fill begins, or vice versa; thus the points M...
