

Energy, Cold Fusion, Antigravity: Znidarsic Science Books (Paperback)

By MR Frank Znidarsic Pe

Createspace Independent Publishing Platform, United States, 2012. Paperback. Book Condition: New. 214 x 136 mm. Language: English . Brand New Book ***** Print on Demand *****.Frank Znidarsic is a Professional Registered Electrical Engineer. He spent a life time working in energy related industries. He presents, from this background of experience, the technologies and problems with fossil fuels and conventional nuclear power. The environmental impact and the finite nature of these energy sources is reviewed in detail. Znidarsic has traveled to many laboratories to witness cold fusion and anti-gravitational experiments. He reveals what he saw and discovered during these visits. After many years of reviewing these results, a Newtonian description of the quantum condition was produced. This Newtonian framework was used to describe many known phenomena. The energy of a photon and the energy levels of the atoms were developed as effects of the approach. The techniques were then used to present the science of Low Level Nuclear Reactions and Anti-Gravity. The mathematics was confined to the final chapters of the book, however, the significance of the discoveries is clearly explained within a historical context. The text was written in such a manner that it will be interesting and educational for...
