The book is a universal theory of probability and mathematical statistics textbook suitable for professional use of non-math class. The barrier the contents need to teach about 60 hours. Can not speak for the arrangements for less than 60 hours of professional analysis of variance and regression analysis. but also by the teachers according to the needs of the professional to choose textbooks. The contents of the first five chapters the lower professional mathematics requirements can only teach part of probability theory. this part can be taught in 32 to 36 hours to finish. This book explains detailed. easy to understand. and also can be used as a reference book of scientific and technical personnel. and self-learners. Table of Contents Chapter 1 EXECUTIVE SUMMARY No random event with probability (1) random events section II of random events the probability of the third quarter of the conditional probability of the fourth quarter total probability formula and Bayesian formula in section V. Section VI of the independence of the events the Bernoulli probability exercises a second random variable and its distribution of the first section of a random variable and its distribution function Section II discrete random variables and their probability distribution Section 3 continuous random variable and its probability density of the fourth quarter random variable function distribution exercises multidimensional random variables...
