ECOSYSTEM DIVERSITY AND CARBON SEQUESTRATION: CLIMATE CHANGE CHALLENGES AND A WAY OUT FOR USHERING IN SUSTAINABLE FUTURE

Astral International (P) Ltd/Daya Publishing House, 2009. Hardcover. Book Condition: New. Carbon Sequestration in nature is of critical value for resolving vital issues of our times, namely the state of ecological paucity natural resource management global warming, climate change and sustainable development. It is free carbon in nature, particularly in the form of CO₂ that is responsible for most of the ills of our environment and that makes future of life on earth bleak and unsustainable. Earth's gradually but steadily...
